Where Employers and Job Seekers Connect

*“By partnering with One-Stop, we were able to test and pre-screen over 2100 applicants and hire 908 employees in 11 days for our call center. From the beginning, One-Stop asked the right questions to understand the skill set we needed for the various positions, and provided enormous insight into the community, the workforce, places to advertise, things to avoid. They helped us post positions and set up a computer for online applications. They assisted us in administering and scoring tests. They worked tirelessly with us and spent many long hours at the site, answering hundreds of questions and providing excellent customer service to our applicants. It is no exaggeration to say we could not have done this without One-Stop.”*
